

## Looking for a person for costume design

For a dance / theater production with premiere in spring 2025 in Basel we are looking for a queer, female or non-binary costume designer.

The dance / theater production addresses the objectification of lesbian sexuality and the sexualization of female bodies. Five dancers with different dance backgrounds and different bodies negotiate patriarchal perspectives from the author's perspective, question heteronormative narratives and develop a 'lesbian gaze'. They empower their sexuality while questioning their own internalized self-objectification mechanisms.

We are a queer team of *white* and Black, disabled and non-disabled, neurotypical and neurodiverse, female and non-binary people. We are a team that is aware of the different intersectional realities of life and we try to be responsive to different needs. There are various mechanisms built into the production process to accommodate diverse needs and counteract internal discrimination. We do our best to produce a safer space.

We would welcome applications from multiple marginalized people and do our best to meet accessibility needs.

Possible working languages are the spoken languages: German, English, French.
